CMMC Model Framework

- CMMCモデルフレームワークは、プロセスとサイバーセキュリティのベストプラクティスを一連の領域に組み込む
 - プロセスの成熟度またはプロセスの制度化は、(セキュリティ)活動が組織の運用に組み込まれているまたは浸透している範囲を特徴付ける。活動が深く浸透しているほど、次のようになる。
 - 組織は、ストレス(圧力)時を含め、活動を継続して実行する。
 - 結果は、一貫性があり、再現性があり、高品質である。
 - プラクティスは、ドメインの各レベルで実行される活動である。

Source Mapping

Appendix E. Source Mapping

This source mapping provides a detailed list of related practices from other frameworks corresponding to each CMMC practice. In this way, the mapping allows an organization to easily identify which CMMC practices correspond to sources in other frameworks that the organization may already be using or may need to reference in the future.

The CMMC practices that align with the FAR Clause 52.204-21 and NIST SP 800-171 Rev 1 are identical to the reference practices. An organization that meets the requirements for the CMMC practice will also meet the requirements for these security requirements. The additional sources are for reference only and do not guarantee that if an organization meets the requirements of these additional sources they will also meet the corresponding CMMC practice. Some practices are sourced to "CMMC" to indicate that they were developed by the CMMC working team or through collaboration with industry.

The below table summarizes related sources for each CMMC practice.
